

Practice Internal Forces Problem

Determine the internal forces and moment at the section zz .

$$+\leftarrow \sum F_{x'} = 0; \quad N - 135.4 = 0; \quad \boxed{N = 135.4 \text{ N}}$$

$$+\uparrow \sum F_{y'} = 0; \quad 325 - 200 + V = 0; \quad \boxed{V = -125 \text{ N}} \text{ as drawn}$$

$$+\curvearrowleft \sum M_{cut} = 0; \quad M + 200(-0.2) - 325(0.4) = 0$$

$$\boxed{M = 90 \text{ N}\cdot\text{m}}$$
