

## Mohr's Circle Cases/Examples

| No | Picture of Shape                                                                    | $I_{xy}$ | $I_x$ vs $I_y$                  | Mohr's Circle                                                                         |
|----|-------------------------------------------------------------------------------------|----------|---------------------------------|---------------------------------------------------------------------------------------|
| 1  |    | 0        | $I_y > I_x$<br>Principal        |    |
| 2  |    | Neg      | $I_y > I_x$<br>Not Principal    |    |
| 3  |   | +        | $I_y > I_x$<br>Not Principal    |   |
| 4  |  | +        | $I_x > I_y$<br>Not Principal    |  |
| 5  |  | Neg      | $I_x > I_y$<br>Not Principal    |  |
| 6  |  | 0        | Assume $I_y > I_x$<br>Principal |  |

| No | Picture of Shape                                                                    | $I_{xy}$ | $I_x$ vs $I_y$           | Mohr's Circle                                                                         |
|----|-------------------------------------------------------------------------------------|----------|--------------------------|---------------------------------------------------------------------------------------|
| 7  |    | 0        | $I_y > I_x$<br>Principal |    |
| 8  |    | 0        | $I_x > I_y$<br>Principal |    |
| 9  |   | Neg      | $I_x = I_y$              |   |
| 10 |  | Neg      | $I_y > I_x$              |  |
| 11 |  | Neg      | $I_x > I_y$              |  |
| 12 |  | 0        | $I_x > I_y$<br>Principal |  |
